

Call for Papers:

# Maastricht Workshop on Applied Economics of the Environment (MAEE)

**16-17 May 2024**  
in Maastricht, The Netherlands

Climate change and environmental pollution are central challenges of our time. Environmental policies that can effectively and equitably incentivize the energy transition, foster climate change resilience and adaptation, and reduce the detrimental impact of environmental degradation on human well-being are urgently needed.

To this end, policymakers must strike a balance between the benefits and costs of such policies, and achieving this necessitates a robust foundation of empirical evidence on their impacts. The aim of the “Maastricht Workshop on Applied Economics of the Environment” is to bring together applied economists to discuss research providing credible empirical evidence on the costs and benefits of environmental and/or climate change policies.

We welcome submissions of papers (including extended abstracts) that address environmental issues, climate change, or evaluate environmental policies from all areas of economics, with a special emphasis on contributions from labor, public, urban, health, or education economics.

**KEYNOTE SPEAKER:**

Antoine Dechezleprêtre (OECD)

Head of Innovation, Entrepreneurship and Technological Transitions

Please upload your papers or extended abstracts via this [link](#)

**SUBMISSION DEADLINE:**

9 March 2024

**NOTIFICATION OF ACCEPTANCE:**

early April 2024

Accepted participants are offered up to 3 nights of accommodation. Financial support is gratefully acknowledged from the Graduate School of Business and Economics (GSBE) and Maastricht University's School of Business and Economics (SBE), especially from the Research Centre for Education and the Labour Market (ROA) and the Finance Department (FIN). PhD candidates and research master students from Maastricht University's School of Business and Economics are welcome to participate free of charge.

**SCIENTIFIC COMMITTEE:**

Olivier Deschênes

(UC Santa Barbara and UCSB Environmental Markets Lab)

Juan Palacios

(Maastricht University and MIT Sustainable Urbanization Lab)

Nico Pestel

(Maastricht University, Research Centre for Education and the Labour Market)
